## **DETAILED ACTION**

### ***Information Disclosure Statement***

1. The information disclosure statement (IDS) submitted on 11/13/2006 has been considered by the examiner, and a copy of the Information Disclosure Statement is attached to this office action.

### ***Claim Rejections - 35 USC § 101***

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claims 1,3-14,16-18,20-22, 24 and 25 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claims 1-25 are drawn to an algorithm, per se, or program performing such or medium resulting from such. Claims to processes that do nothing more than solve mathematical problems or manipulate abstract ideas or concepts are non-statutory. If the "acts" of a claimed process manipulate only numbers, abstract concepts or ideas, or signals representing any of the foregoing, the acts are not being applied to appropriate subject matter. Schrader, 22 F.3d at 294-95,30 USPQZd at 1458-59. Thus, a process consisting solely of mathematical operations without some claimed practical application is drawn to non-statutory subject matter. In this case, the claims merely recite a step of "computing a plurality of individual scale factors ... in the encoded audio signal", without any practical

Art Unit: 2626

application being recited (i.e., the results are not tangible because they are not real-world results—the computation remains with the computer).

For the claimed process to be statutory it must indicate a practical application where, the claim must either: (A) result in a physical transformation outside the computer for which a practical application is either disclosed in the specification or would have been known to a skilled artisan (pre-computer or post-computer process activity), or (B) be limited to a practical application that produces a useful, concrete, and tangible result.

### ***Allowable Subject Matter***

3. Claims 1,3-14,16-18,20-22,24 and 25 would be allowable if amended to overcome the rejections under 35 U.S.C. 101.

### ***Response to Arguments***

4. Applicant asserts on page 10:

The invention as claimed in the amended claims produces encoded audio data. Applicant respectfully submits that producing encoded audio data is a useful, concrete and tangible result and thus the claims do recite a practical application.

The independent claims concern the encoding of a frame of audio data where all the operations are performed within a computer and no real-world results (i.e. the claimed invention has no tangible results).

***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
